
Summary of PhD thesis: Framework agreement for banking services

Author: mgr Jan Szuszkiewicz

Thesis supervisor: prof. dr hab. Wojciech Pyziół

The subject of the thesis is a multifaceted analysis of the bank account agreement in terms of framework. The purpose of the work is to reconstruct the framework rules of this agreement, which are derived from universally binding law, both the law of the European Union and the Republic of Poland. These rules have been grouped and assigned to each stage of contracting: conclusion of the contract, performance of the contract, breach of contract, amendment and termination of the contract. The research goal of the work is to determine whether the current shape of these rules corresponds to the public needs of this type of agreement and whether the legislator has left sufficient scope of contracting freedom to the parties to this contract.
